*Comments*

**Well constructed course !**

**Excellent thought provoking course**

**A well run course with enthusiastic tutors and delegates**

**Excellent course ! A difficult task to incorporate such a huge amount - Where to start ? Really, really gentle, but focused presentation style. Non-patronising but nevertheless careful warnings about 'shark infested waters'**

**Very intense, packed with info. I feel my brain has been revived. I learned finally why you must use a facebow and adjustable articulator. One of the best learning experiences I've had since Tipton (?) restorative. Thank you !**

**Great course !**

**Very Good !**
